

**RBW**

**ROLLING  
BEARINGS  
WEST**

*"We supply more than just bearings"*

Rolling Bearings West (RBW) is a privately-owned family business located in Melbourne's west. From our offices and showroom in Laverton North we have successfully operated and supported local businesses for over 30 years.

Our team of 10 staff members continue to work hard to maintain and build on our solid reputation as the 'go to' people for our customers who require the right industry products in a time of need.

Our success is a result of a continued focus of investing and training in the ongoing development of our staff. This results in the long-term employment of our finest 'Industry Specialists' who deliver over 180 years of industry experience. Our focus ensures they are up to date with latest of industry knowledge and products available, providing the best service for your day to day needs.

Our staff really 'listen to you' so we can clearly understand how we can further support your business. To this end we have recently invested and expanded in our product offerings, far beyond the usual day to day supplies of bearings and seals. You told us, and we listened and understood that you wanted a 'one stop shop' for all your industrial product requirements. This led us to join a wholesale trading group to best provide an efficient and economical solution for you. As such we officially became the Western Distributor of the 'TradeSmart Group' in September 2018.

'TradeSmart' supports RBW and our customers at a wholesale level, with access to over 90 of the best industry suppliers, enabling us to be the 'one stop shop' you wanted. As our customer you will receive our quarterly TradeSmart catalogue, enabling your business to take advantage of ongoing savings.

Our in-house service is underpinned by our four 'on road' Account Manager industry specialists. They are available to attend your facility either on a breakdown scenario, providing onsite technical support, and on a regular basis to carry out site audits, stocktake inspections etc. ensuring your business has the correct amount of inventory you need.

If you need an engineering solution, that is not satisfied by an 'off the shelf' component, our specialist engineering partners will design and manufacture it for you, under our direction and control. This gives your business the advantage of having one supplier who can do it all. No need to hunt around for that elusive specialist contractor.

*All this is backed up with a fast-efficient delivery by our own driver and vehicle. No more waiting for couriers!*

We encourage you to visit our facility to see our product range and be welcomed by our people in our recently refurbished showroom. We are sure you will find this of great interest and well worth the visit.

Managing Directors  
Brett and Chloe Whelan

Equipment manufacturers around the world depend on Timken® tapered roller bearings to reduce friction in moving parts, often under very challenging conditions. When it's time to replace bearings, you can confidently choose Timken.

**TIMKEN**

**Depend On Timken® Tapered Roller Bearings To Give You More**

Continuous improvement has finetuned the performance of Timken® tapered roller bearings (TRBs) to peak levels of performance. As a result, radial TRB performance ratings have been increased for the first time in a quarter of a century. The company's spirit of innovation is exemplified by higher performance ratings that average 10 percent improvement across 20 product types.

**More Value**

Timken tapered roller bearings use advanced technology throughout the design, development, manufacturing and testing processes to give you bearings you can count on for quality.

**Timken® Tapered Roller Bearings More Performance**

Higher useful bearing life and heavier load-carrying capacity, proven by extensive lifecycle tests.

**More Durability**

Timken engineers work closely with customers, so they understand how equipment operators depend on tapered roller bearings to handle tough jobs every day. That's why Timken engineers specify high quality, custom steel and exacting manufacturing standards for bearings that carry the Timken name.

**More Choices**

For the broadest product range in tapered roller bearings, turn to Timken.

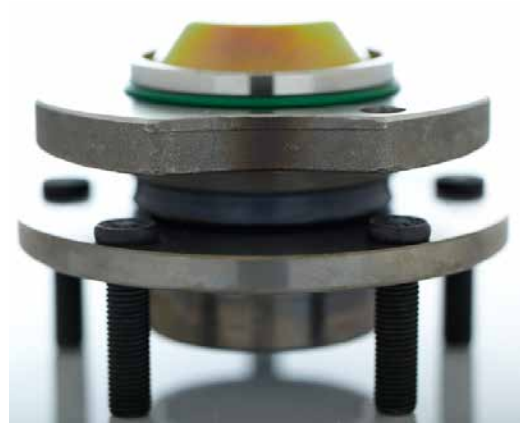

"For all these reasons, we at Rolling Bearings West like to offer Timken bearings to our customers where their application requires the very best bearing performance for their business"

Rolling Bearings West have a strong history in the supply of Asahi bearings and housings to our customers. Their cost-effective bearing solution is designed with a loose-fit bearing which can be interchangeable within your application.

This patented innovation is called a “Self-Alignment bearing” which allow the bearings to self-align within the housing. This bearing range is suitable for many industry applications, as we supply bearing units in the following styles to best fit your business:

- Stainless steel bearings and housings
- Approved for food industry
- Thermoplastic housing
- Aluminium housing
- Stainless steel silver series
- Rod ends
- Take up frames

**ABauto uses only quality bearings, seals and hubs to produce kits to suit a wide range of vehicles.**

The ABauto range will continue to grow along with its brand into the future, providing the automotive aftermarket with a better option for kits and components.

- 4WD Wheel Kits
- Bearings
- Hub Kits
- Light Commercial Wheel Kits
- Passenger Vehicle Wheel Kits
- Trailer Kits
- Caravan, Marine & Axle Kits

**SO Giant are a leading manufacturer of oil seals in Taiwan. With a large and ever-expanding range they make a great quality product at a competitive price.**

We at Rolling Bearings West carry a wide range of oil seals in Nitrile as standard and both Viton and Silicone. Many other styles are available including:-

- Metric and Imperial
- Nitrile
- Viton
- Silicone
- Metal OD Seals
- V Rings – Nitrile and Viton
- O Ring Kits
- VK End Covers

Rolling Bearings West is proud to be an authorised distributor of Tsubaki Leaf, Roller and Conveyor chain. For 20 years we and Tsubaki Australia have responded to industry demands supplying superior quality products, engineering support and services to industrial customers throughout the western suburbs of Melbourne.

Tsubaki is a world-class product that provides productivity improvements and cost/energy savings for the end user. In partnership with Tsubaki Australia we guarantee your business will receive nothing but the very best with these is superior products.

Rolling Bearings West is proud to be an authorised distributor of Kabelschlepp. This German manufactured product range of energy chain and cables systems offer solutions across a wide range of applications for your business.

This brand is synonymous with the automotive, robotics and machine tool industries, providing solutions in the form of cable carriers, conveyor and protection systems, ready to connect cable carrier systems and machine housings for your business. "You will always stay connected with Kabelschlepp."

Renold is one of the world's largest suppliers of industrial chain and mechanical power transmission products. In partnership with Rolling Bearings West, Renold provides engineering solutions for all industries.

Products include a wide range of industrial chains for standard power transmission systems, conveyor and forklift applications. Renold also manufacture sprockets, gearboxes, hydraulic power packs and components, shaft couplings and disc brakes. They partner with us to assist customers with onsite service support. This priority service ensures you meet your deadlines, and we meet your expectations.

**RENOLD**  
Industrial Chain & Mechanical  
Power Transmission Specialists

Rolling Bearings West have an extensive in stock range of V, timing and HTD belts to assist your business.

Our team have extensive experience in power transmission products and we stock associated couplings, pulleys, roller chain, sprockets, and taper lock bushes.

Rolling Bearings West stock a large range of flexible and rigid couplings. We stock a range of quality cast iron taper lock and V-belt pulleys to accommodate a range of shaft sizes.

We also have a large range of timing pulleys and offer bore and key machining services to ensure your business is back up and running in a timely manner.

**Rolling Bearings West take pride in our business keeping your business moving!**

Should you have a failure with an electric drive motor or hydraulic gear box we are here to help. With over a dozen long term relationships with manufactures such as SEW, Brevini and Bonfiglioli, just to name a few. Our team will work hard with our suppliers to prioritise and supply a solution for your business. A fast turnaround time, with either a new replacement or rebuilt component, will get your business moving again.

When requiring vibration mounts for your business Mackay is the rubber solution for you. Their product range is the product of choice for our team at Rolling Bearings West.

Having such a diverse range of engineered rubber and bonded metal/rubber composite designs ensures we have the solution for you. Mackay vibration mounts are successfully used in automotive, manufacturing, construction and industrial applications.

The Rolling Bearings West team will assist your business with the design and manufacturing of a basic conveyor roller, through to a high end fully automated sortation system.

Over the past 30 years we have established partners within the conveyor industry, working with us on small and or large-scale projects for a cost-effective solution for your business. Local manufacturing and a vast range of conveyor rollers, from light duty PVC to heavy duty pallet handling rollers is available for your business.

Rolling Bearings West is proud to be the distributor of a pneumatic automation product being “Metal Work Pneumatic” in the region.

Metal Work has been a leader in pneumatic automation for over 50 years. With the factory in Italy Metal Work Australia has chosen Rolling Bearings West to support local industry with a complete range of products suitable for process equipment including, axial, angle seat, butterfly and ball valves (manual and actuated), and diaphragm valves for water, steam and other media. The Metal Work pneumatic offering is second to none, with modular designed components making installation easy and cost effective for your business.

Rolling Bearings West have partnered with a wholesale supplier whom have been designing and manufacturing high quality wheels and castors for use throughout Australia and the world.

Together we design our castors to steer true, give a smooth ride, require minimal push effort, and have brakes that work every time.

From castors for your office chairs, to medical equipment, and all the way to heavy industrial applications, we make castors for a wide variety of load ratings, features, mount options and styles that seamlessly integrate with your furniture or equipment, across all industries.

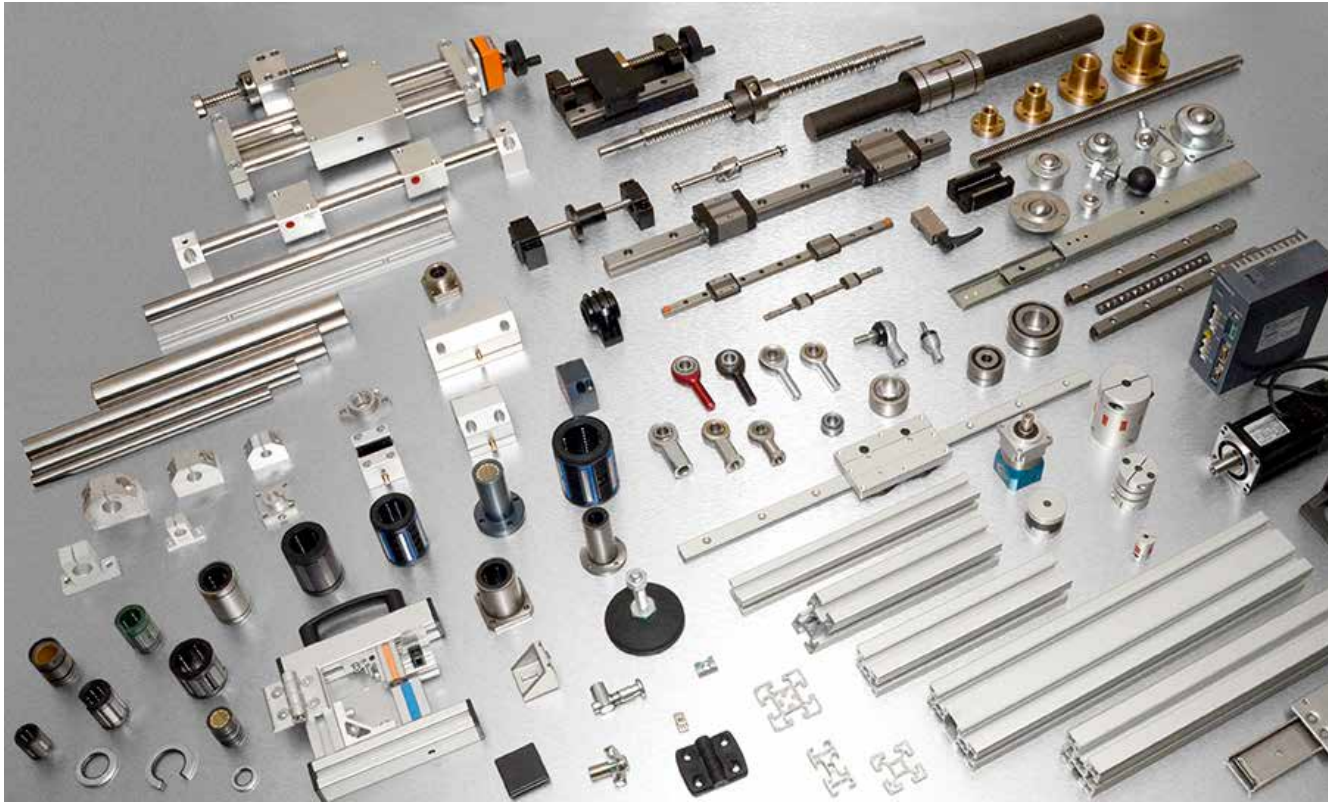

Our design philosophy is simple. Make castors that you can forget about. Which is why with minimal and easy preventative maintenance, you won't have to worry about our castors. They will perform every time. And we back that up with a three year warranty on the castors we make.

Rolling Bearings West have supplied customers with wheels and castors for over 30 years. We identify and assist customers with replacement wheels for all sorts of applications from office chairs, medical equipment and food grade or heavy industrial applications.

We also manufacture to a specific size and rating should larger rated load wheels be required. We also supply materials handling equipment such as trolleys and hand pallet trucks and electric and hydraulic pallet handlers.

Rolling Bearings West have extensive knowledge in linear motion technology. With a vast product range to suit almost every application.

Our team is here to assist from simple shaft and linear ball bushings or ceramic coated Teflon lined bushes, to ball or roller linear guide rail systems for heavy duty load bearing applications.

Rolling Bearings West is a distributor for Alemlube who manufacture high quality, dependable products to help keep the wheels of industry turning. Their wide range of greasing, lubrication, fuel and oil transfer equipment is ideal for your general workshop requirements and manufactured to the highest quality standard for your business.

The product range includes greasing equipment, automatic greasing units, drum pumps and hose reels, on road and off-road vehicle lubrication systems, diesel fuel and oil storage and transfer and metering products such as fuel guns and meters.

We can assist you with workshop fit-outs, hose reels, oil pumps, grease guns, funnels and grease nipples.

## Rolling Bearings West is a distributor of Macnaught lubrication equipment.

A privately-owned company established in 1948, they have been designing and manufacturing premium quality fluid measurement, transfer and lubrication equipment for the agricultural, automotive, industrial, mining and transport industries across the globe for over six decades.

We stock Macnaught's large range of hose reels, oil pumps and grease guns. We've got the very best workshop lubrication equipment for you.

Rolling Bearings West is an authorised re-seller of shell products, specialising in industrial lubricants for our customers.

Effective lubrication can unlock significant value, particularly considering productivity and the costs associated with lost production from equipment downtime. Lubricants play a large part in helping to increase productivity, reduce downtime, meet deadlines and ensure that your business maintains high product quality. In partnership with us, Shell Viva Energy will conduct a site visit to your location and complete a site analysis on how Shell Lubrication may assist your business.

Rolling Bearings West is an authorised re-seller of Castrol products. We have a comprehensive range of world-class lubricants and greases available for our customers.

Using the correct lubricant ensures your equipment runs reliably, even in difficult and sometimes hostile environments and for long periods of time, giving you improved production efficiency. Our staff will help you select and apply the correct product that positively impacts performance, life time and productivity of your machines. Come and speak with us today!

## STELLA - FOOD GRADE LUBRICANTS

### Food Grade Oils (Stella)

Rolling Bearings West is an authorised distributor of Stella food grade lubricants.

These lubrication products are NSF H1 registered and include a complete range of oils, greases, fluids and sprays for food manufacturing and other clean lubrication environments. Suitable for use in the food and beverage pharmaceutical industries they provide clean, safe, odourless, tasteless and nontoxic lubrication for all machinery. We proudly stock Stella products, maintaining all related MSDS, TDS and NSF H1 registration documentation on hand. Should your business require a FG replacement please do not hesitate to contact us.

Rolling Bearings West is a proud distributor of Hi Tec Oil lubricants. Hi Tec Oils is an Australian owned company with more than 200 years of total workforce experience in lubricants. One of Australia's largest independent oil manufacturers. The state-of-the-art blending plant, produces a range of high-quality oil products.

Hi Tec Oils only use products that meet and exceed the relevant API, SAE and ISO standards.

Their wide range of automotive, industrial, agricultural, transport and heavy equipment applications have over 450-line items including full and semi-synthetic mineral oils, greases, specialty products, solvent degreaser, hand cleaner and emergency spill kits.

They also have oils for petrol and diesel engines, agricultural and farm, automotive gear and transmission, industrial, coolant and brake fluids, greases and specialty products. Oils and specialty products sizes range from 500ml up to bulk and grease products are also supplied in sizes 400g up to bulk. Should you be considering a local oil manufacturer for your business, please do not hesitate to contact us today.

Rolling Bearings West is an authorised distributor of LE products, who specialise in high-end, high-value, lubrication solutions.

With access to the most respected lubrication equipment brands in the world, and with over 100 years of technical expertise, LE is your trusted “Reliability partner”. From grease and oil pumps, single and multiline systems, to single automatic grease feeders and 400+ point dual line lubrication systems, LE has the experience and products for your application.

Areas of specific experience include:

- Food processing lubrication systems
- Chain lubrication systems - “micro spray” (food industry approved)
- Single line progressive systems
- Vehicle automatic lubrication
- Grease pumps
- Lincoln injector replacement

If your equipment is operating in a harsh environment, or have an ongoing problem that maybe a lubricant related issue, RBW is here to help you today! With LE Engineers we will do an on-site inspection to assess the issue and recommend a solution.

The Oil Safe® Lubrication Management System is visually intuitive, removing risk from your maintenance process at every step along the way. It prevents the machine failures and downtime you thought were unavoidable.

The Oil Safe® system helps companies with their oil and lube storage and dispensing. Replace rusty old metal oil cans and milk cartons with the Oil Safe® system to keep your fluids clean and help eliminate costly contamination. With 10 different lid colours, lubricants can be quickly identified reducing the risk of adding the wrong fluid to expensive mission-critical equipment. Speak with a RBW staff member about the Oil Safe® range and discuss on how we can help your business today.

**Stretch Spout Lid**

— This and most other products are available in beige, black, blue, dark green, grey, mid green, orange, purple, red, and yellow.

**Mini Spout Lid**

— With an outlet diameter of approximately 7mm, this spout is ideal for lubrication jobs where equipment filler holes are small.

**Stumpy Spout Lid**

— This wide spout model with a 25mm opening is especially designed for applications where a higher lubricant flow is required. Match with a Stumpy Extension Hose to extend spout reach if required.

**Utility Lid**

— Multipurpose lid with large 50mm outlet hole ensures controlled fast pouring of lubricants. Match this lid to a 3, 5 or 10 litre/US quart drum for use with a pump.

**Standard Pump**

— General purpose pump will handle up to ISO 460 fluids.

**Premium Pump**

— Feature rich and will handle up to ISO 680 fluids.

**Drums**

— Compatible with all lids, drums have an extra wide opening for rapid pouring and easy cleaning. Available in 1.5, 2, 3, 5, and 10L.

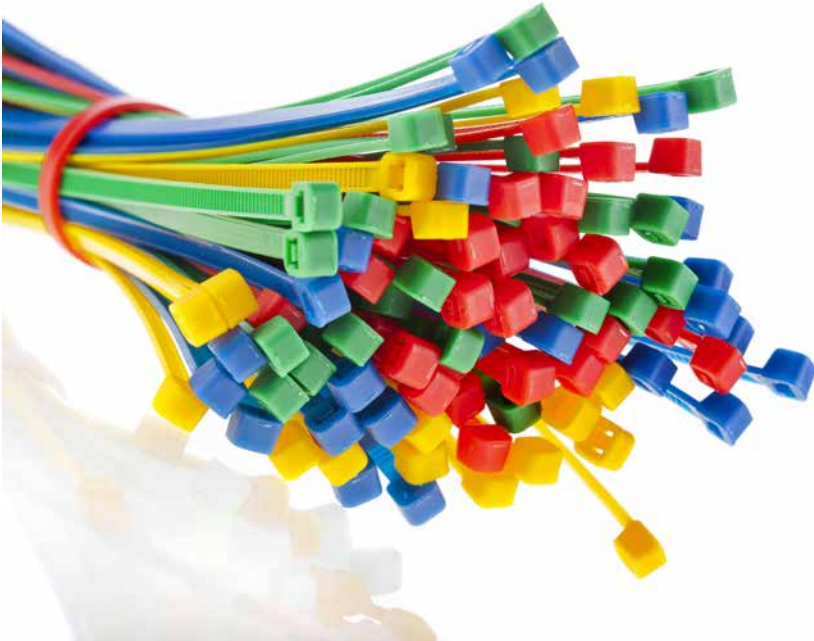

## Flammable Storage / Dangerous Goods Storage Solutions

Dangerous Goods Storage is required for OH&S regulations that state 'Dangerous Goods such as flammable and combustible liquids and toxic substances must be stored and contained separately to reduce the risk of fire spreading quickly'.

Hazardous flammable storage cabinets protect workers, reduce fire risks, and improve productivity by storing hazardous liquids in these cabinets. If dangerous goods are used or stored in your premises, legislation requires that employers ensure the health and safety of employees and visitors by guaranteeing that goods are contained, packaged and labelled correctly in accordance with codes and regulations.

Rolling Bearings West can supply your business an extensive range of Flammable & Dangerous Goods Storage Cabinets which cover almost every possible requirement. Please do not hesitate to enquire today!

Tridon Cable Ties and Hose clamps are the product of choice for our business and our customers. Tridon is 100% Australian owned and has continued to develop its automotive, industrial and hardware product ranges. It now has a comprehensive range of products that are sold in Australia and New Zealand and exported around the world.

Please come visit our instore displays today. We stock cable ties in assorted materials, colours and sizes to suit all types of applications, accompanied with both steel and stainless-steel hose clamps, super clamps, and “P” clips.

Rolling Bearings West has been a partner with Stauff for many years, assisting customers with site test equipment through to high pressure filter elements and much more.

Stauff has been developing, producing and marketing hydraulic fluid components and accessories for over 50 years and has been in Australia for over four decades. Their products provide port-to-port solutions, from the component level, filter systems and filter elements for fluid media, pressure test systems, hydraulic accessories, flanges, tube connectors and quick release couplings, clamping systems for pipes, hoses and cables, machined parts through to value-adding services. Partnering with RBW, Stauff offer value-added services such as assembling the parts, bending tubes, forming and custom system-build solutions.

Rolling Bearings West have supplied customers oils and lubricant for over three decades. Over time customers have asked “can you be a one stop shop and supply us the filter elements too?”

We have recently partnered with Fleetguard, whom manufacture over 8,300 products, covering the widest range of air, lube, fuel and hydraulic filters in the heavy-duty industry. We stock a full line of filters specifically engineered for a wide range of systems. Advanced design and high-quality performance give customers the ultimate protection for all of their equipment.

Fleetguard meet and or exceed OEM specifications to ensure engines and other systems achieve maximum life. Nothing Guards Like Fleetguard – Please ask our RBW staff member for a quote today!!

Rolling Bearings West offer and trust in the Donaldson air and oil filter range. Donaldson is manufactured to withstand whatever the environment throws their way.

Since 1915, they have pioneered the development of nearly every major advancement in heavy-duty engine air filtration. Nothing else protects, performs and provides longer life for engines than their industry-leading filters.

Rolling Bearings West is an authorised distributor Maxisafe Safety Equipment. The product range has enabled RBW customers to further experience the “one stop shop” experience. Customers now have access to purchase safety items in store, or place a phone order and we will deliver to you.

**SAFETY EQUIPMENT**  
**Maxisafe**

We chose Maxisafe as they are a global leader which designs, develops and manufactures a wide range of hand, arm, head and hearing solutions, respiratory and clothing safety solutions. Their innovative and world leading safety products are of the highest quality. Recognised for its unique innovation and extremely high quality they are certified or comply with relevant world safety codes in Australia protecting the workers of today. Please visit our instore display stand, or contact us in the office for a free quote today!

Rolling Bearings West is an authorised distributor of the Typhoon Tools product range, an independent Australian owned company with extensive experience in the wholesale tool business.

With the right product mix, at the right prices, combined with a renowned customer service and lifetime guarantees, they provide you with a product that is well made, looks and feels great and are well priced. Typhoon Tools stand by their product, offering a hassle-free lifetime warranty on hand tools. For all these reasons we choose Typhoon Tools. Please come and visit our store today and check out our Typhoon Tool display.

Rolling Bearings West sells thousands of bearings to customers each year. When selecting the right removal/installation tooling, we can't look past Sykes-Pickervant as being our tool of choice.

Sykes-Pickervant have been manufacturing and distributing premium quality service tools since 1921. They have been used in automotive, industrial, general engineering, maintenance and repair work for almost 100 years.

They continue to innovate, with new products, while ensuring core ranges are modernised to stay at the forefront of technologies in vehicle and equipment design. The range is now in excess of 450 tools including the renowned mechanical and hydraulic pullers that we keep in store. Sykes-Pickavant continue to offer the highest quality products for today's industries and that's why we strongly recommend this being your tool of choice, when removing and installing your bearings.

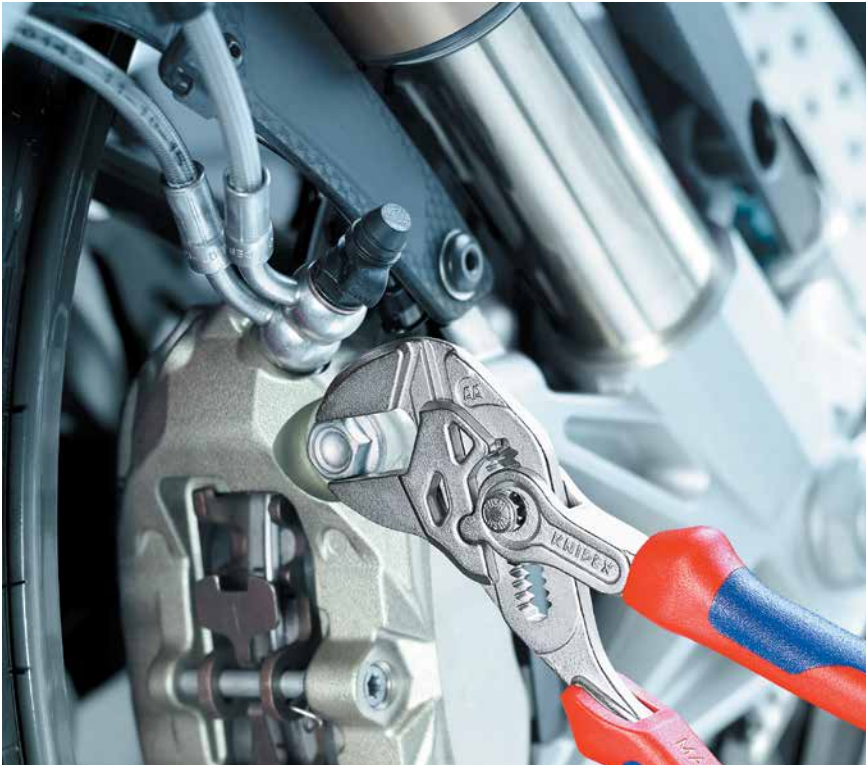

Rolling Bearings West is an authorised distributor of Toledo product range, a leading household name in quality hand tools. An Australian family owned company, Toledo was founded in Sydney more than 65 years ago and is a registered brand of Tridon Australia.

Recognised for premium quality products, extensive ranges and innovative product development their range is in excess of 3200 products and all are designed to make your task easier, faster and safer.

We welcome you to visit our store and experience our Toledo hand tool range, consisting of bearing pullers, measuring equipment, sneaky mirrors and odd tools for the hard jobs, all made easy using a Toledo spanner.

Rolling Bearings West provide customers with circlips every day. We offer our customers the very best in installation equipment so nothing less than Knipex will do when it comes to the right installation tool for the job.

This German based company has manufactured tools since 1882. Please visit our store to experience over 70 different Knipex products, ranging from internal and external circlip pliers, to high quality electrical pliers and multigrips.

**Bonded Abrasives**

Rolling Bearings West offers KLINGSPOR when it comes to Abrasives for your business. KLINGSPOR was the first company to develop premium high speed cut off wheels and grinding discs and have further improved bonded abrasives and continue to manufacture the highest quality wheels available.

The Yellow-Extra high performance wheels will handle virtually any grinding or cutting job. Grinding welds, finishing surfaces, and cutting out auto body panels are perfect applications for these premium grinding discs and cut-off wheels.

General purpose wheels for use on circular saws offer economical, reliable performance in most cutting applications. For fast-cutting action and overall performance on chop saw machines, general purpose wheels will accomplish your goals. Their specialty abrasives flap discs have become commonplace in many production facilities and workshops.

Please visit our store to and check out the vast range of KLINGSPOR we have available.

Rolling Bearings West offer an extensive range of gasket materials, pump and valve packings, fiberglass textiles for thermal insulation applications, rubber and metal fabric expansion joints, mechanical seals, hydraulic and pneumatic seals, boiler gaskets and seals and rubber to metal bonding products. If you need it we can get it!

Rolling Bearings West stocks an extensive range of Loctite® products. The Loctite® brand is renowned for the excellence of its adhesives and sealants. Since the original development of a unique anaerobic technology more than fifty years ago, Loctite® products have become vital components in many of the machines and products that are at the core of everyday life.

A strong commitment to research and development has resulted in the most technically advanced range of products available today that speed manufacturing processes, reduce costs, improve quality and comfortably meet national and international standards. Products provide solutions across the whole spectrum of adhesive technologies and manufacturing processes. They are used in markets as diverse as electronics, automotive, aerospace, biomedical and many manufacturing industries.

We proudly partner with Loctite providing onsite training and solutions for RBW customers. Should your team require training or you have questions on which Loctite product to use for a particular application, please do not hesitate to contact us to assist you with Loctite's up to date information.

CRC is recognised as a supplier of professional quality aerosol and bulk lubricants, anti-corrosion and chemical maintenance products, that's why we at Rolling Bearings West have a large stock of CRC instore available for our customers.

When we specify a CRC product to suit your application you can be assured of getting a product that surpasses all maintenance and repair industries highest standards of environment, performance and safety!

Rolling Bearings West is an authorised distributor of Orapi lubricants offering a wide range of products dedicated to the maintenance and upkeep of equipment and machinery in the industry. Orapi is a European company who produce more than 2500 products, providing manufacturers with solutions that facilitate their work, space their service periods and protect and extend the life of their equipment and machinery.

Rolling Bearings West maintain a large stock of Orapi lubricants, identifying with our customers the five key areas of interest being, de-seizing, cleaning, lubricating, assembly and protection. Should you have an application that requires a higher level of performance, please speak with our team about the Orapi product range.

Rolling Bearings West has distributed Lightning to our customers for many years. It is a trusted brand and famous for its range of quality cleaning products. The history of Lightning dates back to the early 1900's when eucalyptus was found to be an exceptional cleaner and a natural disinfectant. The family business of "cleaning" was born from this.

The Original Jell Hand Cleaner was blended with natural citrus and combined with eucalyptus to be highly effective for removing grease, paint rubber and carbon black. The company philosophy of making cleaning products using fewer harmful chemicals and environmentally friendly raw material as possible started in the mid 1900's. These products work so well, it is hard to pigeon hole them for one specific purpose. That's why we stock a vast range of Lightning products in store for our customers.

### Oil Spill Containment Solutions

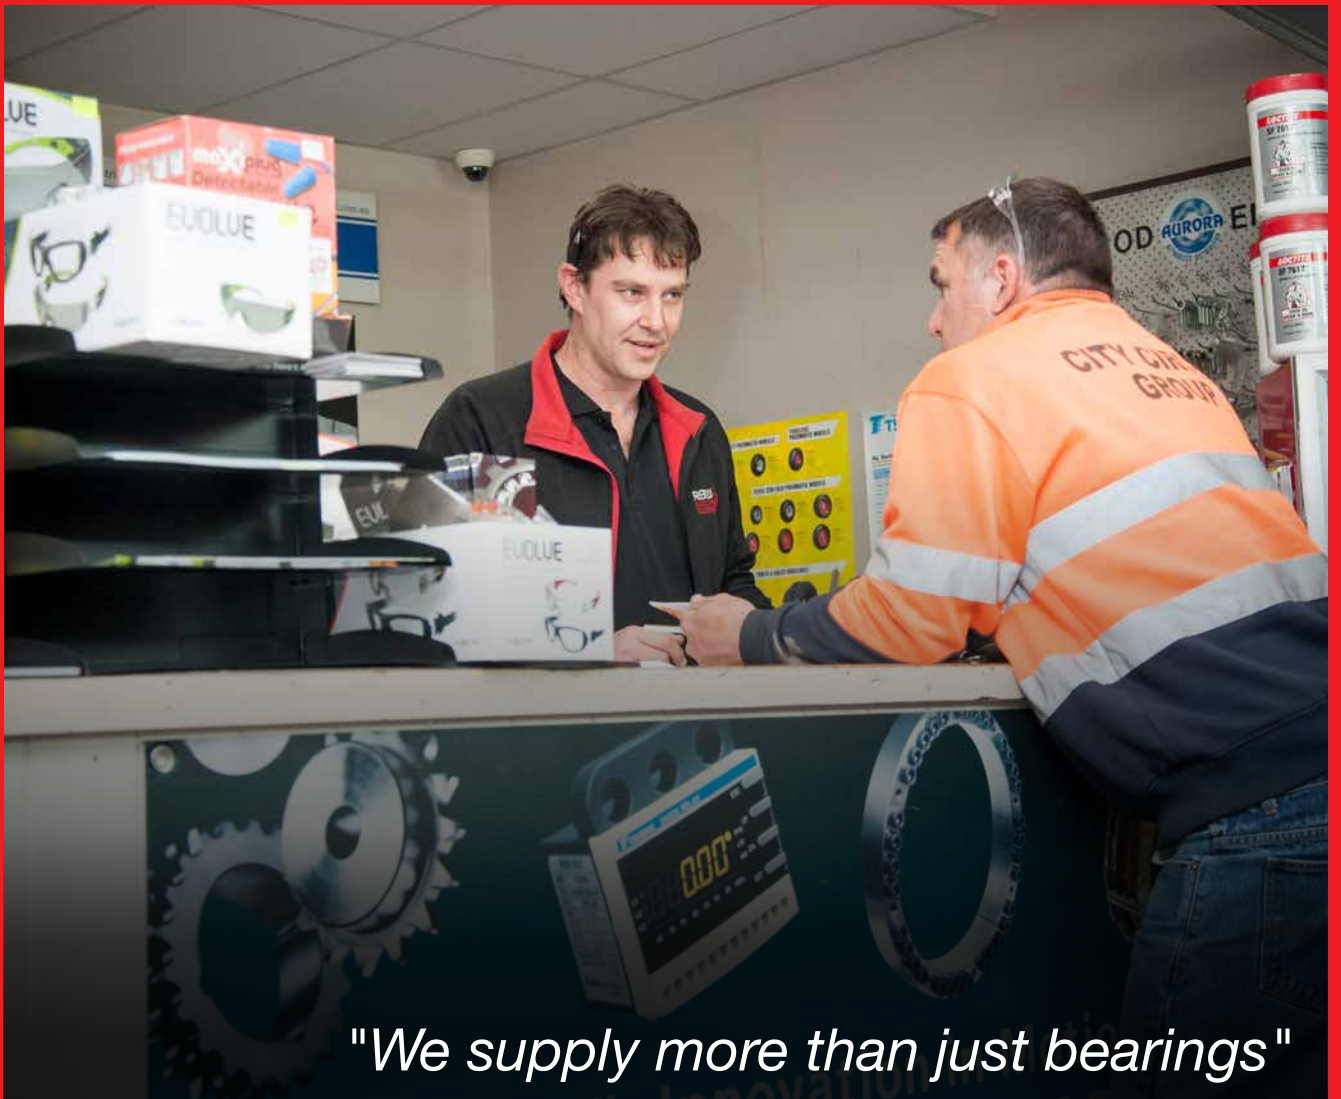

Rolling Bearings West provides its customers oil spill solutions, ensuring your business deals with onsite mishaps, in a safe and friendly manner. We will supply your business a range of products from workshop rags (White T-shirt/ Coloured T-shirt and White Towel Options available) through to portable spill kits and wheelie bin options. Please do not hesitate to enquire today!

### HTO Spill King - Portable Spill Bag

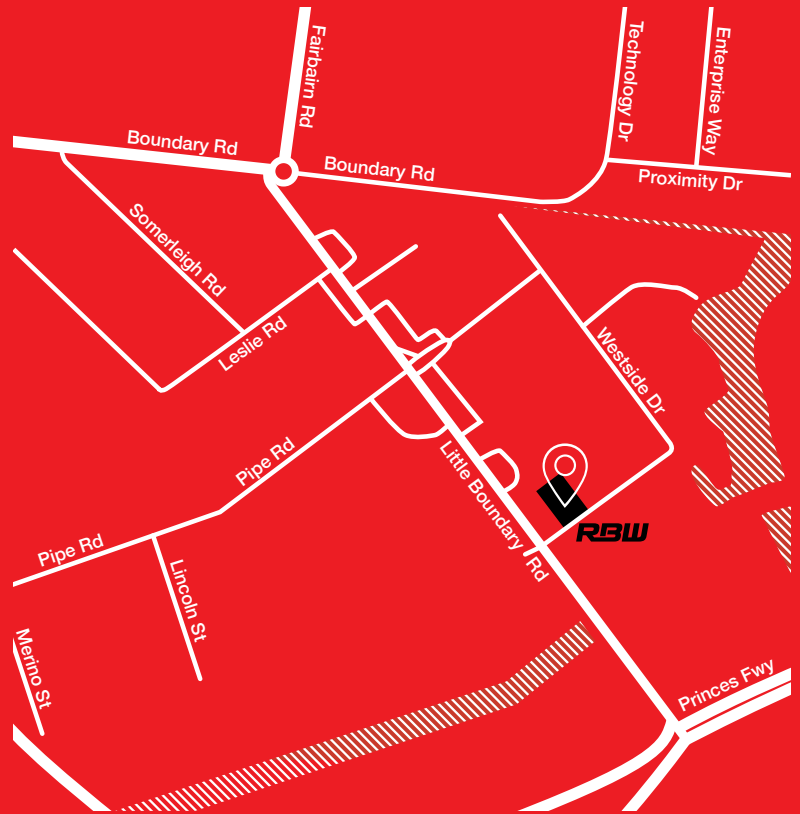

Portable oil spill kit bags are available in stock. Store them in your vehicle or hang in the workshop for fast spill maintenance. Easy access 120L and 240L large wheelie bin kits are also available. There is a vast range of contents available within these kits, from soaker pads, absorbent socks and bunding associated products. Also available are several styles of absorbents being coconut husk, kitty litter or zeolite volcanic rock formula that best suit your business. The kits are well equipped and can be easily wheeled to a spill area and components quickly rolled out for easy spill clean-up. Replenishment items can be sourced and quickly replaced by us ensuring your business is 'spill ready' next time round.
